

**Name**

CyberAudit Workshop

**Date**

Tuesday, June 4, 2019

**Time**

8:00 AM - 4:00 PM

**Session Description:**

The Cyber Audit Workshop will consist of hands-on activities for auditing cyber security through a Cyber Maturity Assessment (CMA). Based upon real-world examples, you will work with the tools and templates necessary to assign risk levels to your company's current cyber security program. The execution of a CMA will empower you to identify what foundational cyber risk management functions are in place and help prioritize your planned cyber audits for the audit year. Prior to the workshop, thought topics will be provided on what specific information to gather that will enable you to work on tangible objectives for both the CMA and your cyber audit plan during the workshop. Upon completion, you will be armed with the knowledge and tools necessary to launch your own cyber audit program.

**Speakers**

[Tyler Farrar - Digital Globe](#)

**Speaker Bio(s)**

Tyler brings over 12 years of broad and diversified technical experience in developing cyber security strategy, threat intelligence, and governance and compliance. He has substantial experience leading and managing information security programs to plan, design, and deploy scalable enterprise security operations platforms to effectively equip the enterprise and provide a clear path from current state to a program that can support future business needs. Tyler also has managed numerous offensive cyber operations for the Department of Defense while serving in the military.
